

HO HOANG DUY

Software Engineering

ABOUT ME

Adaptable IT graduate with hands-on experience in full-stack development (Laravel, Next.js) and system troubleshooting. Proficient in leveraging AI tools for fast problem-solving and code optimization. A quick learner eager to deliver practical solutions in a dynamic team.

EDUCATION

BTEC Higher National Diploma in Information Technology
BTEC FPT International College
08/2023 – 08/2026 (Expected)

SKILLS

- Laravel & PHP
- React & Next.js
- C# & Python
- SQL & Git
- Hardware / IoT
- IT Support

LANGUAGE

- Vietnamese
- English

+84-833-813-414

Ca Mau City – Viet Nam

EXPERIENCE

- ShopDee - AI-Integrated E-commerce** 04/2026
Full-stack Web Application
 - Engineered a scalable, decoupled architecture utilizing Laravel for secure RESTful APIs and Next.js/React for a dynamic, real-time frontend.
 - Integrated Python microservices to deploy Machine Learning models (SVM, Neural Networks) for advanced fraud detection.
- Learning Management System (LMS)** 08/2025
Web Application
 - Developed a robust PHP/MySQL platform featuring secure Role-Based Access Control (RBAC) across Admin, Lecturer, and Student portals.
 - Programmed end-to-end academic workflows, including course distribution, real-time online assessments, and automated grading modules.
- Smart Home & Mobile Robotics** 04/2025
IoT & Hardware Logic
 - Programmed C++/Arduino microcontroller logic to establish smart home automation and seamless sensor data integration.
 - Designed complex motor control algorithms and servo-driven sequences for a mobile robot's directional navigation and clamping system.
- IT Helpdesk & System Optimization** Present
Freelance
 - Diagnosed hardware/software bottlenecks and executed OS optimizations to maximize PC performance and system reliability.
